ROCK CHIP REPAIR

FREE rock chip repair in just 5 minutes

We take the hassle out of a chipped windshield by quickly bringing the repair process to you. A repair takes as little as 5 minutes and can be done at your location or ours.

our services are free

You may be wondering: How do you do this for free? Our service is provided in conjunction with the insurance industry. If left unrepaired, a common rock chip will often completely crack, requiring a windshield replacement. The replacement will cost the insured their full deductible (typically \$100 to \$500) and the insurance company the balance of the windshield cost (typically \$300 to \$1,300).

Repairs like this save the insurance industry millions of dollars each year. This service is a win for both our customers and the insurance industry. Our repair program is honored by 100% of the major and 97% of the minor insurance companies. With comprehensive coverage, the insurer is willing to pay the full cost of repair and waive any deductible. For those who choose to pay out of pocket, our rates are reasonable and competitive.

touch-ups are free

In certain cases, the resin will continue to cure and shrink during the month after your repair. You may notice that the surface of the glass is not as smooth as it was the day of the repair. This is normal. Please stop by any of our locations nationwide and we will touch it up at no charge.

how we do it

- ◆ Protective barrier is placed on the car.
- ◆ Technician removes all dirt, foreign matter and loose glass from the damaged area.
- ◆ An injection path is made at the point of impact.
- ◆ A bridge is placed over the repair area.
- ◆ A resin is injected into glass.
- ◆ Bridge is removed, the resin is allowed to cure and the excess resin is scraped smooth.
- ◆ Polish is applied and the repair is complete.

THIS REPAIR IS ABSOLUTELY FREE

Technician repairing a chipped windshield

our service pledge

We strive to provide the absolute best in quality, technology, professionalism and customer service. We are committed to excellence. Our trained technician will perform your repair to the highest standards. We use only the highest quality equipment and materials. We go the extra mile to do it right - we even warranty the repair!

why repair?

- ◆ To save you time and money.
- ◆ To save your insurance company money, which saves you premium costs in the long run.
- ◆ To improve safety. Often, a replaced windshield will not be as strong as the original, factory-installed glass.
- ◆ There is less potential for leaks; most vehicles do not leak when they come from the factory, but a significant number of replaced windshields do!

our business is growing

If you would like to own your own business, increase your income or start a new career, give us a call to discuss this unique opportunity.
